5. Discussion on school data and grading

Discussed school grading and compared to previous years and comparable schools. Silver Crest received more points than previous years and showed improvement, but our grade went down because other schools also improved and the grading system uses a curve.

Used information from the grading to help determine priorities for SCC.

- English/Language Arts seems to be the area that Silver Crest struggles with the most, this is especially obvious in the students who are currently in the 5th grade.
- There are serious attendance issues with some students
- Discussed means to encourage the best teachers to remain at Silver Crest

6. Agenda items for next meeting

- Discuss attendance
